DIRECTORS' REPORT, 1 JANUARY TO 31 DECEMBER 2011

The Honkarakenne Group's net sales were EUR 55.0 million (2010: EUR 58.1 million; 2009: EUR 52.3 million). The Group made an operating profit of EUR 1.9 million (EUR 1.3 million; EUR -3.0 million). Profit before taxes was EUR 1.1 million (EUR 0.4 million; EUR -3.7 million). The EPS was EUR 0.17 (EUR 0.23; EUR -1.05). The Board of Directors will propose to the General Meeting that no dividends be paid for the concluded financial year, but that a repayment of capital totalling EUR 0.08 per share be paid out from the fund for invested unrestricted equity.

Profit improvement programme

In 2010, the Group initiated a two-year improvement programme which was concluded at the end of 2011. The programme was set up at a time when the Group's financial position was weak, having seen a significant reduction in net sales in the previous year and suffering heavy losses. The main objectives of the improvement programme were to improve the Group's financial position, to restore the Group's earning power, and to boost sales to a profit-making level. At the end of the two years, the Board of Directors can state the following about the success of the improvement programme:

Financial position

The key figures representing the financial position at the start of the improvement programme were an equity ratio of 28.8% and gearing of 149%. At the end of the two-year programme, the Group's equity ratio was 53% and gearing was 35%. The targets related to financial position were fully achieved, and the Board considers the Group's financial position to be good.

Earning power

In the year when the improvement programme was initiated, the Group made a loss before tax of EUR -3.7 million, with net sales of EUR 52.3 million. In the year in which the programme ended, the company had net sales of EUR 55.0 million and profit before taxes of EUR 1.1 million, meaning that net sales increased by EUR 2.7 million and profit before taxes by 4.8 million.

The Group's target was to improve its earning power by EUR 8 million. The Board estimates that the improvement in earning power over the two years reached EUR 4.1 million, which means that the Group came half-way to meeting its target. However, the Board considered the Group's earning power to be satisfactory at the time of writing.

Sales growth

Achieving growth in sales was a major component of the profit improvement programme. This was to occur hand in hand with the improvement in earning power. At the start of the programme, the Group's net sales totalled EUR 52.3 million and at its end, EUR 55.0 million per year, meaning a growth rate of 5%. In the same period, the revenues of industrial Finnish log manufacturers grew by approximately 17%, taking account of both domestic sales and exports. This means that the Group did not meet its sales growth targets during the improvement programme.

Net sales and market overview

The Group's net sales fell by 5% from 2010. Sales began to be affected by the latest recession from mid-May 2011, when a significant reduction in new signed deals was observed. The economic crisis became major global news in July, from when there was a clear decrease in sales.

Although overall net sales fell, growth was achieved in three of the Group's five market areas. Net sales from the East market area grew by 9% over the previous year, from the Far East by 21% and from the Other Markets by 70%. Meanwhile, net sales from Finland fell by 11% and from the West by 31%.

In Finland, the reduction in net sales took place almost entirely in the holiday home segment. Sales of detached houses grew significantly in Finland, but this growth was insufficient to offset the negative trend in the holiday home segment.

In Finland, the Group emphasised the development of energy-efficient solutions, holiday house models and urban timber construction projects during 2011. In the first quarter, the company launched the Honka Säästö™ energy-saving concept. Honka Säästö™ is a unique structural solution thanks to which summer holiday homes with all the modern comforts can be kept completely cold during the winter. This significantly reduces the energy costs of holiday homes and safeguards them from problems caused by outages during the winter.

In 2011, Honkarakenne launched new holiday home models such as the Saariston Tähti range, which is targeted at the needs of vacationers in the archipelago areas. The Lokki model, launched at the Holiday Housing Fair in Mäntyharju, was elected the Log House of the Year by a panel assembled by Hirsitaloteollisuus. The final choice was made by designer Ristomatti Ratia and Professor Jouni Koiso-Kanttila.

In August, Honkarakenne presented the regional development venture to be implemented in Suurpelto in Espoo. High-quality and ecologically sustainable wooden urban homes will be built in Suurpelto, using the collaborative construction method.

In the **West** market area, the focus was on sales of the Honka Fusion™ concept. In order to boost sales, sales training related to the concept was organised for all importers in the West market area. Detached house models, based on the Honka Fusion™ concept, were launched in Germany and the UK in the second quarter. Efforts were also made, especially in Germany, to recruit additional distributors.

Net sales from the West market were a disappointment for the second year in a row. Most of the decrease took place in the German market, where Honkarakenne was unable to carry out all the desired reforms of the distribution network.

In the **East**, the second quarter saw the Group's launch of the new Honka Jewels™ range of models in the premium segment. All models in the range are large detached houses. The Jewels™ range takes account of the typical needs of customers in the eastern premium segment. This range was well received in the area, the first deals being made immediately after the launch. In the fourth quarter, sales promotion was mainly achieved through fairs, and new representatives were sought from Russia's neighbouring countries.

In the **Far East**, the first quarter was overshadowed by Japan's natural disaster in March. In the second quarter, existing product ranges were renewed in response to developments in customer needs. In support of sales, a concept handbook was prepared specifically for importers, which facilitates discussion between the seller and the customer when purchasing decisions are being made. The tsunami increased energy consciousness in Japan; in response to this, Honkarakenne added triple-paned windows, well known in the Nordic countries, as a standard accessory for all house shipments to Japan.

In the **Other Markets**, sales were pursued from individual large projects. Sales network development activities were focused on North America, where the network structure was modified during the second and third quarters.

In the fourth quarter, Honkarakenne streamlined its log range in all market areas, to better fit customer demand

and future energy restrictions. This reform should lead to higher customer satisfaction and greater cost efficiency in designing new houses.

The Group's order book totalled EUR 13.6 million at the end of December (compared to EUR 18.0 million one year previously). The order book refers to orders whose delivery date is within the next 24 months. Some orders may include conditions related to building permits or financing.

Earnings and profitability

The operating profit for 2011 was EUR 1.9 million (EUR 1.3 million), with profit before taxes totalling EUR 1.1 million (EUR 0.4 million).

The table below shows the year-on-year profit development from 2010 to 2011 in further detail.

Operating profit before non-recurring items, 2010	2.5
Profit improvement programme and decrease in sales	-1.0
Other items	0.1
Operating profit before non-recurring items, 2011	1.6
Non-recurring items, 2011	0.3
Operating profit, 2011	1.9

Non-recurring items for 2011 include a gain of EUR 0.34 million on the sale of the Group's holding in Karjalan Lisenssisaha Invest Oy, as well as EUR 0.06 million in costs related to the implementation of the profit improvement programme.

Overall, the effect of the improvement programme was EUR +4.1 million, comprising EUR +5.1 million in 2010 and EUR -1.0 million in 2011.

Investments and financing

The financial position of the Group improved during the report period. The equity ratio stood at 53% (42%), while interest-bearing net liabilities totalled EUR 6.1 million (EUR

12.8 million). EUR 0.8 million (EUR 3.2 million) of the interest-bearing net liabilities included a covenant condition with a 30% loan-to-equity ratio. The Group's liquid assets totalled EUR 2.6 million (EUR 1.9 million). The Group also had a cheque account with a limit of EUR 10.0 million, of which EUR 9.2 million (EUR 6.8 million) was unused at the end of the reporting period. Gearing totalled 35% (73%). The Group's fixed asset investments in 2011 totalled EUR 1.0 million (EUR 0.6 million).

The Group made financial arrangements in December 2011, signing a loan agreement which took effect after the reporting period, in January 2012. As a consequence, in January the Group's short-term liabilities were EUR 2.8 million lower and, correspondingly, its long-term liabilities were EUR 2.8 million higher than at the year-end. At the same time, the cheque account limit was reduced by EUR 2 million to EUR 8 million.

Products, research and development

Between January and December, the Group invested EUR 0.5 million (EUR 0.6 million) in research and development, corresponding to 1.0% of annual net sales (1.1%). The Group did not capitalise any research and development costs during the financial year.

Research and development activity focused on improving the energy efficiency of houses, observing the building regulations of different markets, and further developing non-settling logs.

Major operational risks

Local rules and regulations have a strong impact on construction. Adapting to rapid change presents a tough challenge. Honkarakenne prepares for this risk by closely monitoring changes in building regulations in various markets, and through the timely introduction of products that fully comply with prospective regulations. For this reason, energy efficiency and regulatory issues form the R&D focus.

Honkarakenne has one significant distributor dealer, whose sales make up over 15% of the Group's total net sales.

The Group has one significant credit risk concentration regarding sales receivables from one particular importer and its open balance of sales receivables, which does not include a bad debt allowance. New sales with the importer in question have been paid in accordance with the set payment terms. The importer in question has been receiving continuous deliveries, and the risk associated with its open balance of sales receivables has not increased. During the second quarter, the Group signed a payment plan contract with the importer regarding the sales receivables. The balance in question decreased during 2011.

Environment

Ecology, longevity and energy efficiency are the key strengths of log house construction. Wood is a renewable resource and provides an ecological and sustainable choice of building material. A growing tree acts as a carbon sink, binding carbon dioxide from the atmosphere and locking it into the walls of a wooden house for hundreds of years to come. At the same time, new forests grow on solar energy, binding more carbon and slowing down climate change. Wood is a natural choice for responsible house builders and consumers who wish to be mindful of future generations.

At Honkarakenne, we build our environmental policy on sustainable, versatile forestry; careful use of all wood raw materials; saving energy; and recycling our waste and using recyclables.

When buying the raw wood we need, our forestry professionals work in strict compliance with laws and regulations. Our Forestry and Environmental department experts are qualified in nature management. In our environmental policy, we are committed to the certification of Finnish forests (FFCS), and never procure wood from protected areas.

New, ever more-stringent energy regulations call for new log products, which we continue to develop. Our manufacturing plants follow several procedures that respect nature, always striving to do what is best for the environment. Our investments in research and product development enable us to employ new, environmentally friendly production methods. ETA certification and the right to use the CE mark also ensure that Honkarakenne's operations always follow high quality and environmental standards.

We have put our environmental principles into practice in our effective production system. We believe that careful and economical use of raw materials, saving energy, making use of by-products and recycling waste for further use all contribute to responsible management of nature. At Honkarakenne, we use our sawmilling by-products as packaging material, and label our recyclable, wooden packaging materials according to EU standards. We convert our log ends, second-grade timber and waste wood into wood chips and burn them for energy recovery. Our cutter chips are supplied for use as agricultural bedding, while spare log ends from the production process are used to make wood wool.

We sort and pre-process our plastic packaging films and plastic-based binding strips. We send all recyclable materials out for further processing. All other waste is sorted at the factory and sent for either recycling or storage. We have waste collection contracts with regional waste management companies.

Log production is ecological for two key reasons. Firstly, despite the relatively energy-intensive wood drying process, which accounts for the majority of energy consumption in the mechanical wood processing industry, the industrial log production process only consumes about 50% of the energy required to make cement, and about 20% of that needed to make bricks. Secondly, at Honkarakenne we have designed our production process to a high degree of precision, so that only a very small fraction of wood is left behind as waste. This waste wood is utilised and made into by-

products, with the remainder being burned to generate thermal energy.

Our Alajärvi factory commissioned its own 3.0 MW thermal energy plant in 2008. The plant's combustion technology has also been adapted to use super-dry cutter chips, making it fully compliant with current emission standards.

Our associated company, Puulaakson Energia Oy, produces all the thermal energy needed for our Karstula factory's drying plants, and also provides thermal energy for the local Karstula district heating network. As fuel, the energy plant uses bark, sawdust and dried wood chips, which are by-products from the Karstula factory. Honkarakenne owns 41% of the plant.

The Honkarakenne Logistics department is in charge of transport arrangements and efficiency. All inward and outward journeys are carefully planned, so that our delivery trucks never travel empty: return deliveries carry semi-finished products from Finnish sawmills and other suppliers.

Personnel

At the end of the financial year the Group employed 261 people (2010: 266; 2009: 313), and the average number of employees during the year was 265 (291; 351). Compared to the previous year, this represents a reduction of 26 employees. The number of personnel at the Group's non-Finnish subsidiaries was 14 (15; 22). At the end of the financial year, the parent company employed 247 (251; 289) people, and the average number of employees for the year was 251 (373; 303).

The Group personnel were distributed as follows: 51% (49%) at the Karstula factory, 33% (35%) at the Alajärvi factory, and 16% (16%) at the head office in Tuusula. The proportion of clerical and management personnel was 43% (43%). The proportion of female employees was 17% (16%). At the end of the year, there were six part-time employees, representing 2.4% (3%) of the personnel. The proportion of temporary personnel was 1.6% (0.4%). A total of 0.3%

(0.3%) of the personnel were aged under 25, and 39% (34%) were aged 50 or over. The average employee age was 45 (45) years. The average number of years of service in the parent company was 14.6 (15.2) years.

Temporary layoffs were implemented throughout the work-force during the year under review. Production had a total of 9,079 (13,002) layoff days. Absences due to illness or accidents at work totalled 1,474 (2,936) days in total. Other absences amounted to 171 days. Among clerical and management personnel, there were 1,397 (1,955) layoff days, around 304 (546) days of sick leave, and 62 (24) days of other absences.

During the financial year the Group had expenses from salaries and rewards totalling EUR 8.6 million (EUR 9.8 million; EUR 10.5 million).

Personnel training and development

In 2011, Honkarakenne continued a personnel training programme, begun in 2010 for the purpose of improving cooperation between different functions. The focus was on the development of interaction, between thirty key personnel, on strategy implementation and managerial work. Efforts were also made to secure direct information and innovation channels between key people and senior management.

Organisational changes

At the end of the year, the members of the Executive Group were Esa Rautalinko, President and CEO; Reijo Virtanen, Director of Manufacturing and Logistics; Eino Hekali, Director of Design and R&D; Risto Kilkki, Director of Sales; Sanna Wester, Director of Marketing; and Mikko Jaskari, Chief Financial Officer.

Sanna Wester, Director of Marketing, joined the Group in June 2011.

Corporate structure

The parent company of the Honkarakenne Group is Honkarakenne Oyj, domiciled in Tuusula. The other companies doing business in the Group, as of 31 December 2011, were the wholly owned Honka Japan, Inc. (Japan), Honka Blockhaus GmbH (Germany) and Honkarakenne S.a.r.l. (France), and the associated company Puulaakson Energia Oy (41% share).

The earlier Group subsidiary Finwood (Paltamo, Finland) merged with the parent company in October 2011.

The Group divested itself of its 37.5% holding in the associated company Karjalan Lisenssisaha Invest Oy in February 2011.

Rights issues and the management incentive scheme

On 31 May 2010, the Board of Directors made a decision on a new Executive Group bonus scheme, with the aim of allowing significant long-term management shareholdings in the company. In relation to this Honkarakenne made a directed rights issue of 220,000 B shares and the Executive Group also acquired an additional 49,000 Honkarakenne B shares in 2010. In the second quarter of 2011, the Board decided to make a directed rights issue of 17,250 B shares that it had in its possession, in order to enlarge the system so that a new member of Honkarakenne's Executive Group, Sanna Wester, could join it.

In 2011 in the directed issue, Honkarakenne relinquished to Honka Management Oy, a holding company set up by the management, a total of 17,250 of its own shares (HONBS) as part of the Executive Group share ownership scheme. The purchase price of the shares was EUR 5.26 per share for a total of EUR 90,735. After the transaction, at the year-end, Honka Management Oy owned 286,250 B shares in Honkarakenne Oyj.

Shares

Honkarakenne did not buy any of its own shares during the financial year. At the end of the financial year, the Group owned 364,385 of its own B shares, at a total purchase cost of EUR 1,381,750.23. These shares made up 7.05% of the company's share capital and 3.35% of all votes. The acquisition cost of the shares was entered in the consolidated financial statements, as a deduction from shareholders' equity.

The share capital of Honkarakenne Oyj comprised 5,168,968 shares, of which 300,096 were A shares and 4,868,872 were B shares. Each B share entitles to one (1) vote and each A share entitles to twenty (20) votes, representing a combined total for all Honkarakenne shares of 10,870,792 votes. Profit will be distributed in such a way that EUR 0.20 will be paid on each B share, followed by EUR 0.20 on each A share, and any remaining profits will be distributed equally on all shares. The company's share capital is EUR 9,897,936.00.

If a series A share is transferred to a non-shareholder otherwise than by inheritance, testament, or matrimonial right, it is obliged to be announced to the corporate board. The board has the right to redeem the series A shares in the book value of the previous financial year within 30 days from the announcement by using the reserve fund or other assets exceeding the share capital. If the redeem is not completed the corporate board is liable for giving an announcement to all series A shareholders. Then, the shareholders have the right of redemption with the same terms as described above within another 30 days. If more than one shareholder wishes to execute his right of redemption, the redeemable series A shares shall be split accordingly to the original number of the shareholders' shares. Or, if this is not possible, by draw. There are no restrictions to transfer B shares.

Disclosures concerning shares and shareholders in accordance with the Decree of the Ministry of Finance on the Regular Duty of Disclosure of an Issuer of a Security

(153/2007) are also presented on the parent company's shares and in the notes concerning shareholders.

Authorisations of the Board

The General Meeting of 1 April 2011 granted the Board authorisation to acquire up to 400,000 of its own B shares with funds from the unrestricted equity. In addition, the meeting authorised the Board to make a decision on either a bonus or capitalisation issue of shares, as prescribed in Section 1, Chapter 10 of the Limited Liability Companies Act, regarding the issue of options rights in one or more batches. This authorises the Board to issue a maximum of 400,000 new shares and/or transfer a maximum of 400,000 existing company-owned B shares, including shares that may be transferred with special option rights. Both authorisations are valid until 25 March 2012.

Corporate governance

Honkarakenne Oyj abides by the Finnish Limited Liabilities Companies Act and the Finnish Corporate Governance Code of 1 October 2010 set by the Finnish Securities Market Association. The Group's Corporate Governance Statement for the period from 1 January to 31 December 2011 will be provided as a separate document, independently of the Board of Directors' Report, and may be found after the official financial statements on page 57.

In the financial year 2011, the Board of Honkarakenne Oyj consisted of Lasse Kurkilahti (Chairman), Anders Adlercreutz, Mauri Niemi, Teijo Pankko, Pirjo Ruuska, Mauri Saarelainen (Deputy Chairman) and Marko Saarelainen.

The Group's auditors were the Authorised Public Accounting Firm KPMG Oy Ab, with Reino Tikkanen as Head Auditor.

Incidents after the end of financial reporting period

CEO Esa Rautalinko resigned on 27 Jan 2012. The acting CEO has been Mikko Jaskari since 2 Feb 2012.

Future prospects

The net sales and profit before taxes for 2012 are expected to remain at the previous year's levels. Due to the seasonal nature of the business, the first quarter is expected to be loss-making. These forecasts are subject to a certain level of risk arising from the fact that the company's order book was 25% smaller at the year-end than a year previously.

The order book totalled EUR 13.6 million at the end of 2011 compared to EUR 18.0 million at the end of 2010. The order book refers to orders whose delivery date is within the next 24 months. Some orders may include conditions related to building permits or financing. The order book total was 25% lower at the end of 2011 than at the end of 2010.

Board proposal for the allocation of profits

On 31 December 2011, the parent company's unrestricted equity stood at EUR 3.6 million, of which distributable funds totalled EUR 0.7 million. Distributable funds are decreased by the loan of EUR 0.9 million issued to Honka Management Oy. The parent company's profit for the financial year was EUR 0.3 million.

The Board of Directors will propose to the General Meeting that no dividends be paid for the financial year ending on 31 December 2011, and that the remaining profit be transferred into the unrestricted equity. The Board of Directors proposes that a repayment of capital totalling EUR 0.08 per share be paid from the Fund for invested unrestricted equity.

Tuusula, 15 February 2012

BOARD OF DIRECTORS

This report contains forward-looking statements, which are based on information and assumptions held by the Management at the time of writing and on decisions and plans made by the Management at that time. While the Management believes that these forecasts are well grounded, it cannot provide any absolute guarantee that the assumptions in question will be realised.

ACCOUNTING POLICIES USED IN THE CONSOLIDATED FINANCIAL STATEMENTS

Honkarakenne Oyj is a public limited liability company founded in accordance with Finnish laws and domiciled in Tuusula. The address of its registered office is PO Box 31 (Lahdentie 870), FI-04401 Järvenpää, Finland. The company manufactures and sells log houses in Finland and abroad.

A copy of the consolidated financial statements is available on the company website at www.honka.com or from Honkarakenne Oyj's head office at the above address. These consolidated financial statements were authorised for issue by the Board of Directors of Honkarakenne Oyj on 15 February 2012. According to the Finnish Companies Act, shareholders are entitled to approve or reject the financial statements at the Annual General Meeting held after their publication. The Annual General Meeting may also decide on amendments to the financial statements.

These Honkarakenne consolidated financial statements have been prepared in accordance with the International Financial Reporting Standards (IFRS) and in conformance with IAS and IFRS standards and SIC and IFRIC interpretations valid on 31 December 2011. IFRSs, referred to in the Finnish Accounting Act and in ordinances issued based on the provisions of this Act, refer to the standards and their interpretations adopted in accordance with the procedure laid down in regulation (EC) No. 1606/2002 of the EU. The notes to the financial statements are also in compliance with Finnish accounting principles and corporate legislation.

The Group adopted the International Financial Reporting Standards (IFRS) for the first time in 2005, in accordance with IFRS 1 - First-time Adoption of IFRS as of 1 January 2004.

The figures in the consolidated financial statements are based on original acquisition costs unless otherwise stated below, and are presented in thousand euro.

Preparation of financial statements requires making forward-looking estimates and assumptions that may or may not occur in the future. Discretion is also required in applying the accounting principles of the consolidated financial statements.

Principles of consolidation

The consolidated financial statements include the parent company Honkarakenne Oyj and all its subsidiaries where over 50% of the subsidiary's voting rights are controlled directly or indirectly by the parent company, or the parent company is otherwise in control of the company.

The company established in connection with the incentive plan of the members of the Executive Group, Honka Management Oy, is presented in the consolidated financial statements according to SIC-12. The share acquisitions were financed by capital investments in Honka Management by the members, as well as by an EUR 851,023 loan provided by Honkarakenne Oyj. Honkarakenne Oyj issued 220,000 shares for subscription in 2010 and 17,250 shares in 2011 by Honka Management. In addition, the executives acquired 49,000 Honkarakenne B shares in 2010. On the balance sheet date, Honka Management Oy owned 286,250 Honkarakenne B shares. Based on the shareholder agreement, the parent company is in control of Honka Management Oy and the latter is thus included in the consolidated financial statements. Parent company shares owned by Honka Management Oy are eliminated from the Group balance sheet and distributable equity. The elimination is disclosed under own shares. The investments of the owners of Honka Management Oy to the company are presented in the consolidated statement of financial position as non-controlling interest.

Mutual ownership has been eliminated according to the acquisition cost method. Acquired subsidiaries are included in the consolidated financial statements from the date when the Group has obtained control, and divested subsidiaries up to the date when control ceases. All intercompany transactions, receivables, liabilities and unrealised profits, as well as distribution of profits within the Group, are eliminated. Unrealised losses are not eliminated if they result from impairment.

Associated companies in which Honkarakenne holds between 20% and 50% of voting rights and exercises significant influence, but no control, are included in the consoli-

dated financial statements, using the equity method. When Honkarakenne's share of losses exceeds the carrying amount of an associate, the carrying amount is reduced to nil and recognition of further losses is discontinued except to the extent that the Group has incurred obligations in respect of the associate.

Use of estimates

Preparation of the consolidated financial statements in accordance with IFRS requires management to make estimates and assumptions. Discretion is also required in applying the accounting principles of the consolidated financial statements. Even though the estimates and assumptions made represent management's best knowledge at the time, the realised results can differ from these estimates and assumptions. Management has considered the following areas of the financial statements to be the most critical, because the principles involved in preparing them require most estimations and assumptions:

- determining the useful life and total depreciation/amortisation periods for non-current intangible and tangible assets;
- recoverable amount for intangible and tangible non-current assets;
- probability of future taxable profits against which tax deductible temporary differences can be utilised;
- net realisable value of inventories;
- fair value of trade receivables;
- amount of cost provisions;
- presentation of contingent assets and/or liabilities;
- measurement of fair value of assets acquired in connection with business combinations; and
- elements of impairment testing.

Foreign currency translation

Figures on the financial performance and standing of Group companies are presented in the currency of each company's primary operating environment ("functional currency").

The consolidated financial statements are presented in euros, which is the parent company's functional and presentation currency.

Foreign currency transactions are translated into the functional currency at the exchange rates valid on the date of transaction. Monetary assets and liabilities are translated into the functional currency, at the exchange rate valid on the balance sheet date. Non-monetary items, which have been measured at fair value, have been translated into euros using the exchange rate of the valuation date. Other non-monetary items have been measured at the exchange rate quoted on the transaction date.

Gains and losses from foreign currency transactions and from the translation of monetary items have been recognised in the statement of comprehensive income. Exchange rate gains and losses from business activities (sales and acquisitions) are included in the corresponding items above operating profit. Exchange gains and losses from financial activities are recognised as financial income and expenses.

The income statements of foreign Group companies have been translated into euros using the average exchange rate for the financial year, while their balance sheets have been translated using the exchange rate for the balance sheet date. Differences resulting from the translation of income statement items at the average rate and balance sheet items at the closing rate are recognised as a separate item in equity. Translation differences resulting from the elimination of the acquisition cost of foreign subsidiaries are recognised in equity. When a subsidiary is divested, accumulated translation differences are recognised in the statement of comprehensive income, as part of the gain or loss on sale. Goodwill arising on the acquisition of foreign subsidiaries and fair value adjustments made in connection with the acquisition to the assets and liabilities of the subsidiaries are treated as assets and liabilities of the foreign entity and translated into euros at the exchange rate of the balance sheet date.

Net sales and entry principles

Sales of goods are recognised after the risks and rewards of ownership and actual control of the goods have been transferred to the buyer, and the amount of income and business

expenses can be reliably measured, and where it is likely that the sale will result in future economic benefit to the company. Income is measured at the fair value of the consideration received or receivable, adjusted by indirect sales taxes, sales discounts and exchange rate differences relating to foreign currency sales. Honkarakenne Group's income from long-term projects is recognised on the basis of the percentage of completion when the final result of a project can be reliably measured. The stage of completion is determined on the basis of proportion of costs incurred for work performed to date, compared to the total estimated costs, i.e. the cost-to-cost method.

Other operating income and expenses

Other operating income includes gains from disposal of assets and regular income not generated from primary activities, such as rental income.

Employee benefits

Pensions

Honkarakenne Group's pension plans are classified as defined contribution plans. Payments made into defined contribution pension plans are expensed in the period to which they apply.

Operating profit

Operating profit is the net sum calculated by adding other operating income to total sales and deducting the costs of materials and services, personnel expenses, other operating expenses, depreciation and amortisation, and impairment of non-current assets. Foreign currency differences related to working capital items are included in operating profit, whereas foreign currency differences related to financial assets and liabilities are included in financial income and expenses.

Income taxes

Accrual-based taxes that are based on the taxable income calculated in accordance with the local tax legislation and present tax rate in force for each Group company, tax adjustments for prior years and changes in deferred taxes are recognised as income taxes in the statement of comprehensive income.

Deferred tax assets and liabilities are recognised using the liability method for all temporary differences between the taxable values of assets and liabilities and their carrying amounts. Deferred tax is recorded using the tax rates valid at the balance sheet date.

Principal temporary differences arise from fixed assets, appropriations and tax losses carried forward. Deferred tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the asset can be utilised. Deferred tax is not recognised on goodwill, which is non-tax-deductible.

Intangible assets

Goodwill

Goodwill is measured as the excess of the cost of an acquisition over the acquirer's share of the net fair values of the acquired company's identifiable assets, liabilities and contingent liabilities at the date of acquisition. Goodwill generated through business combinations that took place before 1 January 2004 corresponds to the carrying amount as determined under the previous standards on 31 December 2003, which has been used as the deemed cost. The classification or accounting of such acquisitions has not been adjusted in the Group's first IFRS-compliant financial statements.

Goodwill is recognised at original cost. Goodwill is not amortised, but tested annually for any impairment. To this end, goodwill is allocated to cash generating units. Goodwill is measured at original acquisition cost less any impairment after the acquisition.

The acquisition cost of associated companies does not include goodwill.

Research and development expenses

Research expenses are recognised in the statement of comprehensive income in the year in which they have been incurred. Expenditure on development activities related to new products and processes has not been capitalised because the income they are expected to generate in the future is not certain until the products enter the market. Intangible assets are amortised from the date they are ready for utilisation. The amortisation period is determined by the estimated useful life of the asset. An asset that is not ready for utilisation is tested for any impairment annually or more often as required.

Other intangible assets

Patents, trademarks, licences and other intangible assets with a limited useful life are recognised in the consolidated balance sheet and amortised on a straight-line basis over their expected useful lives. Intangible assets with an indefinite useful life are not subject to depreciation, but are tested for any impairment annually or more often as required. The Group does not currently possess any intangible assets with an unlimited useful life.

Periods of amortisation used for intangible assets:

Software	3–5 years
Other intangible rights	5–10 years
Research and development expenditure	5–10 years

The acquisition cost of intangible assets consists of the purchase price, including any directly attributable costs of preparing the assets for their intended use.

Capital gains or losses resulting from the divestment of intangible assets are entered as other operating income or expenses in the statement of comprehensive income.

Subsequent expenditure on other intangible assets is capitalised only when it increases the company's future economic benefit from the assets in question over what has originally been estimated. All other expenditure is recognised when it is incurred.

Tangible assets and revaluations

Tangible assets consist mainly of land, buildings, machinery, tools and equipment. They are valued in the balance sheet at original acquisition cost less accumulated depreciation and any impairment losses. The acquisition cost of self-constructed assets includes the cost of material and direct labour. When an asset includes several components with different useful lives, the components are accounted for as separate items.

Revaluations of land and buildings are depreciated in the consolidated financial statements in the manner permitted by IFRS 1: First-time Adoption of IFRS. The shareholders' equity is decreased by a corresponding amount.

Expenditure incurred to replace a separately-recognised component in a tangible asset is capitalised. Other subsequent expenditure is capitalised only if it will generate future economic benefits to the company from the asset. All other expenditure, such as normal maintenance and repairs, is recognised as an expense in the statement of comprehensive income when it is incurred.

Depreciation is recognised on a straight-line basis over the expected useful lives of the tangible assets. Land is not depreciated.

The estimated useful lives of property, plants and equipment are (years):

Buildings and structures	20–30
Machinery and equipment	3–12
Other tangible assets	3–10

Gains or losses arising from the disposal of tangible assets are recognised in the statement of comprehensive income.

Impairment

The carrying amounts of assets are tested at each balance sheet date to determine whether there is any indication of impairment. If such indication exists, the asset's recoverable amount is estimated. An impairment loss is recognised whenever the carrying amount of an asset or cash-generating unit exceeds its recoverable amount. Impairment

losses are recognised in the statement of comprehensive income.

An impairment loss on a cash-generating unit is allocated first as a reduction to the carrying value of goodwill allocated to the cash-generating unit and thereafter as a reduction to the carrying amount of other assets in the unit on a pro rata basis.

For intangible and tangible assets, the recoverable amount is the higher of their fair value less costs of selling and their value in use. When assessing value in use, estimated future cash flows are discounted to their present value based on the average cost of capital rate (pre-tax) of the cash-generating unit, adjusted for risks specified to the assets.

With respect to tangible assets and other intangible assets excluding goodwill, impairment losses are reversed if there has been a change in the estimates used to determine the recoverable amount. An impairment loss is not, however, reversed beyond what the carrying amount of the asset would have been (less depreciation and amortisation) if no impairment loss had been recognised in previous years. An impairment loss on goodwill is never reversed.

In calculating the recoverable amount of financial instruments, such as available-for-sale assets or receivables, the estimated future cash flows are discounted to their present value based on the original effective interest rate. Current receivables are not discounted. An impairment loss is reversed if a later realised addition to the recoverable amount can be reliably attributed to an event that takes place after the impairment loss was recognised.

Leases

In accordance with the criteria set out in the IAS 17 Leases standard, lease contracts under the terms of which the Group substantially assumes all the risks and rewards of ownership are classified as finance leases. Assets obtained under finance leases, less accumulated depreciation, are recognised under tangible assets and the associated obligations are recognised in interest-bearing liabilities. When the lessor is a Group company, the present value of future lease payments is recognised as interest-bearing receivables and assets that have been leased out are removed from the

lessor's tangible assets. Lease payments under finance leases are divided into financial expense or financial income, and a reduction of a liability or receivable. Rental income and lease payments under operating leases are recognised as income or expense in the statement of comprehensive income.

Assets financed with leasing contracts defined as finance leases under IAS 17 are recognised in the balance sheet and are measured at an amount equal to the lower of their fair value at the inception of the lease and the present value of the minimum lease payments. Assets financed with finance leases are depreciated as planned and any impairment losses are recognised. The assets are depreciated according to the schedule specified for tangible assets, however not exceeding the lease period.

Inventories

Inventories are valued at the lower of acquisition cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business, less the estimated costs of completion and estimated necessary selling expenses.

The cost is determined using the first-in, first-out (FIFO) principle and includes all direct expenses incurred in acquiring the inventories and other indirect attributable expenses. The cost for finished goods and work in progress represents the purchase price of materials, direct labour, other direct costs and related production overheads excluding selling and financial costs. An allowance has been established for obsolete items.

Financial assets and liabilities

Honkarakenne Group has applied the IAS 39 (amended in 2004) Financial Instruments: Recognition and Measurement standard as of 1 January 2005. Financial assets and liabilities for 2004 were valued according to the Finnish Accounting Standards. As of the beginning of 2005, the Group's financial assets are classified based on IAS 39 into the following groups: financial assets at fair value through profit or loss, loans and other receivables, and available-for-sale financial assets.

The classification is carried out based on the purpose for which each financial asset was acquired and is done in conjunction with the original acquisition. Transaction expenses are included in the original carrying amount of financial assets in the case of an item that is not measured at fair value through profit or loss. All purchases and sales of financial assets are recognised on the transaction date. Financial assets are derecognised if the Group loses the contractual right to cash flows or if it transfers substantial risks and income outside the Group.

Currency derivatives are only used to hedge foreign currency cash flows from sales. Hedge accounting is not applied, but changes in fair value are recorded in the statement of comprehensive income as an adjustment of sales.

Interest rate swaps are recognised in the financial items of the statement of comprehensive income on the expiry dates of the loans, and are measured at market value.

Currency derivatives and interest rate swaps are classified at Level 2 in the fair value hierarchy.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are divided into two sub-groups: assets held for sale and assets categorised as financial assets at fair value through profit or loss at inception. Financial assets held for sale have mainly been acquired to gain profit from short-term changes in market prices. Derivatives that do not meet the requirements of hedge accounting have been classified as held for sale. Assets held for sale as well as financial assets expiring within 12 months are presented in current assets. The items in this group are measured at fair value using quoted market prices in an active market, i.e. the purchase rates at the balance sheet date. Any realised and unrealised gains or losses from changes in fair value are recognised in the statement of comprehensive income for the period in which they occur.

Loans and other receivables

Loans and other receivables are non-derivative assets with fixed or determinable payments that are not quoted in an active market and not held for sale. This group of assets

includes the Group's financial assets resulting from the delivery of cash, goods or services to a debtor. They are carried at amortised cost and are presented as current or non-current financial assets depending on their nature; assets expiring after 12 months are presented in non-current assets.

This class also includes trade receivables, which are measured at cost. A provision for impairment on trade receivables is established when there is objective evidence that the Group will be unable to collect a receivable in full. Default of payments or payment delays are indications of impairment on trade receivables. Impairments are recognised in the statement of comprehensive income as an expense.

Available-for-sale financial assets

Available-for-sale financial assets are non-derivative financial assets that are specifically categorised in this group or that have not been categorised in any other group. They are presented as non-current financial assets except when they are expected to be sold within 12 months of the balance sheet date, in which case they are presented in current assets. Available-for-sale financial assets may include shares and interest-bearing investments, and are measured at fair value. The fair value of the items in this group is mainly determined using quoted market prices in an active market, i.e. the purchase rates at the balance sheet date.

Changes in the fair value of available-for-sale financial assets are presented in fair value reserves under equity, taking the tax effect into consideration. Fair value changes are transferred from equity to the statement of comprehensive income when an investment is sold or its value has been impaired, so that a related impairment loss must be recognised. There are no transactions in the fair value reserve.

Cash and cash equivalents and other financial assets

Cash and cash equivalents comprise cash on hand, demand deposits and other short-term, highly liquid investments. Items in cash and cash equivalents have a maximum maturity of three months from the date of acquisition. Credit accounts connected to the Group accounts are included in interest-bearing non-current liabilities. The Group has a

legal contractual right of set-off to make payment or otherwise eliminate the amount owed to creditors either in whole or in part.

Financial liabilities

Financial liabilities are initially recognised at fair value based on the consideration received. Transaction costs, which are not significant for the Group, are recognised as expenses in the statement of comprehensive income at the time the debt is drawn. Financial liabilities are included in current and non-current liabilities, and they are mainly interest-bearing.

Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligation and a reliable estimate of the amount of the obligation can be made. Provisions arise from guarantees, onerous contracts, litigation, environmental or tax risks or restructuring plans. Obligations arising from restructuring plans are recognised when detailed and formal plans have been established and the parties involved in the restructuring have been informed, thus giving a valid expectation that such plans will be carried out. The recognised provision is the best estimate of costs required for the fulfilment of the existing obligation on the balance sheet date. Provisions are discounted to present value if the time value of money is material.

Equity, dividends and own shares

Dividends proposed by the Board of Directors are recorded in retained earnings in the consolidated balance sheet for the financial period during which the Annual General Meeting approves them.

When Honkarakenne Oyj's own shares are repurchased, the amount of the consideration paid, including directly attributable costs, is recognised as a deduction in equity.

Segment reporting

The IFRS 8 Operating Segments standard, which entered into force on 1 January 2009, did not have an effect on Honkarakenne's segment reporting. Honkarakenne Group has one operating segment: the manufacture, sales and marketing of log houses under the Honka brand. The internal reporting of the management is in line with IFRS reporting. For this reason, separate reconciliations are not presented. External income of the Honkarakenne Group is generated by a large customer base.

More information on net sales, assets and investments is provided based on the following geographical segments: Finland, West, East, Far East, Other Markets and Process Waste Sales for Recycling.

West includes the following countries: Austria, Belgium, Cyprus, Czech Republic, Denmark, Estonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

East includes the following countries: Azerbaijan, Kazakhstan, Russia, Ukraine and other CIS countries.

Far East includes Japan and South Korea.

Other Markets includes the following countries: Bulgaria, China, Croatia, Mongolia, North and South America, Romania, Serbia, Turkey as well as new target countries and markets.

Earnings per share

Earnings per share (EPS) are calculated by dividing the profit or loss for the period attributable to equity holders of the parent company by the weighted average number of outstanding shares. Treasury shares are not included in the number of outstanding shares. Diluted earnings per share (EPS) are calculated by dividing the profit or loss for the period attributable to equity holders of the parent company by the weighted average number of outstanding shares,

taking into account the number of shares potentially acquired through the conversion of options. Share options have a dilutive effect if the subscription price of an option is lower than the price of the share.

Non-current assets held for sale and discontinued operations

The Group classifies non-current assets or disposal groups as held for sale if the sum corresponding to their carrying amount is to be accrued mainly from the sale of the assets. For an asset to be classified as held for sale, the asset must be available for immediate sale in its present condition under conventional terms, the management must be committed to a plan to sell the asset, the asset must be actively marketed for sale, and the sale must be highly probable within one year of the date of classification. Non-current assets held for sale and assets related to discontinued operations that are classified as held for sale are measured at the lower of carrying amount and fair value less selling costs. Once classified as held for sale, these assets are no longer depreciated.

New IFRS standards and IFRIC interpretations

The Group adopted the following new standards, interpretations and their amendments that entered into force in 2011. However, the adoption of these standards and interpretations did not essentially affect the Group's result and consolidated statement of financial position.

IASB have issued the following standards and interpretations, but they are not yet effective and the Group has not applied these requirements. Honkarakenne estimates that the below mentioned standards will mainly have impact on the presentation of financial statements as well as to the scope of notes to the financial statements.

- Amendment to IFRS 7 Financial Instruments: Disclosures (effective for financial periods beginning on or after 1 July 2011). The EU has not yet adopted the new amendment.
- Amendment to IAS 12 Income taxes (effective for financial periods beginning on or after 1 Jan 2012). The EU has not yet adopted the new amendment.

- Amendment to IAS1 Presentation of Financial Statements (effective for financial periods beginning on or after 1 July 2012. The EU has not yet adopted the new amendment.
- IFRS 9 Financial Instruments (effective on 1 Jan 2012). The EU has not yet adopted the new standard.
- IFRS 10 Consolidated financial statements (effective for financial periods beginning on or after 1 Jan 2013). The EU has not yet adopted the new standard.
- IFRS 11 Joint Arrangements (effective for financial periods beginning on or after 1 Jan 2013). The EU has not yet adopted the new standard.
- IFRS 12 Disclosures of Interest in Other Entities (effective for financial periods beginning on or after 1 Jan 2013). The EU has not yet adopted the new standard.
- IFRS 13 Fair value measurement (effective for financial periods beginning on or after 1 Jan 2013). The EU has not yet adopted the new standard.
- IAS 27 (revised 2011) Consolidated and separate financial statements (effective for financial periods beginning on or after 1 Jan 2013). The EU has not yet adopted the revised standard.
- IAS 28 (revised 2011) Investments in Associates and Joint Ventures (effective for financial periods beginning on or after 1 Jan 2013). The EU has not yet adopted the revised standard.

Honkarakenne estimates that other revisions or amendments to other issued IFRS standards and IFRIC interpretations will not have significant impact on Honkarakenne's financial reporting.

NOTES TO THE HONKARAKENNE GROUP CONSOLIDATED FINANCIAL STATEMENTS (1–9)

1. Segment reporting

Honkarakenne Group has one operating segment by IFRS 8, the manufacture, sales and marketin of log houses, under the Honka brand.

The internal reporting of the management is in line with IFRS reporting and for that reason, separate reconciliations are not presented. Management reporting monitors development of operations by geographical business areas. Management reporting is aimed to serve target settings and following-up the budget and should be seen as a management tool, not as a financial accounting measurement method.

Geographically the sales of the Group divide as follows: Finland, West, East, Far East, Other Markets and Process waste sales for recycling.

West includes the following countries: Netherlands, Belgium, Spain, Ireland, Great Britain, Ideland, Italy, Austria, Cyprus, Latvia, Lithuania, Luxembourg, Norway, Portugal, Poland, France, Sweden, Germany, Slovakia, Slovenia, Switzerland, Denmark, Czech Republic, Hungary and Estonia.

East includes the following countries: Azerbaijan, Kazakhstan, Ukraine, Russia and other CIS countries.

Far East includes South Korea and Japan.

Other Markets includes the following countries: Bulgaria, China, Croatia, Mongolia, North and South America, Romania, Serbia, Turkey as well as new target countries and markets.

In addition the sales of factory process waste for recycling is reported separately from the actual Honkarakenne core business operations.

Net sales are reported by the location of the customer and assets are reported by the location of the assets.

The external sales of the Honkarakenne Group accumulate from wide customer base. Concerning IFRS 8 the significant sales of single customers were 9.3 million Euros in 2011 and 8.2 million Euros in 2010.

Tax losses carried forward	1 429	163	1 592
Other temporary difference	23	12	35
Total	1 453	175	1 627

The Group had 0.0 million EUR (4.2 million EUR 31 Dec 2009) of taxable losses carried forward which had not been recognised in tax assets. The principles used in recognising deferred tax assets were carefully reviewed by the management during the preparation of the 2010 consolidated statement of financial position. Unrecognised tax assets from 2009 were mainly recognised in the consolidated statement of financial position through income statement in 2010. The tax losses in Finland will expire in 2013-2019; no time limit exists for utilisation in Germany.

1073 thousand EUR is allocated to the Group's Finnish companies and 519 thousand EUR in the subsidiary in Germany. Losses of 18 thousand EUR remain unrecognised in deferred tax assets.

	1 Jan	Recorded in the income statement	31 Dec
Deferred tax liabilities in 2010

31 Dec 2011	300	4 869	5 169	9 898	520	5 316	1 896	17 630

Honkarakenne Oyj has two series of shares: A shares and B shares. There are minimum of 300,000 and maximum of 1,200,000 A shares and minimum of 2,700,000 and maximum of 10,800,000 B shares.

Each A share entitles to 20 votes and each B shares entitles one vote at the Annual General Meeting.

Profit distribution of 0.20 EUR per share will be paid first for B shares, then 0.20 EUR per share for A shares, followed by equal distribution of remaining profit distribution between all shares.

The maximum number of A shares is 1,200,000 shares and the maximum number of B shares is 10,800,000 shares. All issued shares have been paid.

The parent company had a total of 78,135 treasury B shares on 31 Dec 2011 (95,385 shares on 31 Dec 2010).

After the date of consolidated financial statements the Board of Directors has proposed to the Annual General meeting that no dividend is paid. In 2010 dividend of 0.10 EUR was paid for B shares and no dividend was paid for A shares.

After the date of consolidated financial statements the Board of Directors has proposed to the Annual General Meeting that a repayment of capital totaling 0.08 EUR per share will be paid from the fund for invested unrestricted equity. In 2010 there was no repayment of capital.

Premium fund

Where the terms of options were determined in accordance with the old Limited Liability Companies Act (734/1978), monetary payments received for share subscriptions adjusted by any transaction expenses have been recognised in equity and the premium fund in accordance with the terms and conditions of the scheme.

Fund for invested unrestricted equity

Fund for invested unrestricted equity includes other equity investment instruments and the subscription price of shares when this is not according to separate decision recorded in share capital.

24. The most significant risks and methods of risk management

We have identified four risk types to which the Group is continually exposed: strategic risks, operational risks, financial risks and the risk of damage. Our risk assessment includes considerations for the probability and possible impact of these risks.

Strategic risks

Strategic risks are associated with the nature of our business, and include factors such as changes in our operating environment; changes in market conditions and legislation; sourcing of raw materials; the nature of our business operations; the reputation of the Company, its brands and the source of the raw materials it uses; and large investments. In addition, we list the Company's management structure and the sustainability of our reporting principles among our strategic risks.

Changes in our operating environment and market conditions

Consumer habits and buying power are influenced by global economic fluctuations in all market areas in which we operate. A possible drop in the current level of demand could influence the Company's advance sales and its overall profitability. Our response to such a situation would include a greater control of the flow of goods; adjustments in the level of personnel in different parts of the business; boosting our marketing efforts; closing down unprofitable business units; and an overall boost to all our operations. Although the Company is taking active measures to manage its expenditure, failure to manage the above risks could significantly threaten Honkarakenne's business, financial position, results, future prospects and share price.

Economic fluctuations may also threaten the solvency of the Group's customers and its suppliers' operations. At Honkarakenne we put a great deal of effort into understanding our customers' needs, and we translate that understanding into continual development of new products for new customer segments.

Any problems in our distribution channels may have an effect on the demand for our products. This presents a particularly high risk in the Russian market, where our entire business relies on the performance of one single importer. Further problems may arise from attempts to revise the distribution channels; reasons due to distribution businesses themselves; or competitors' products entering the same distribution channels that we are using.

Economic recession may also decrease the value of land, shares and property owned by the parent company.

Risks associated with the sourcing of raw materials

We follow the 'principle of multiple suppliers' in sourcing our critical raw materials and subcontracted products, in order to ensure the smooth running of the business. At Honkarakenne we stretch the use of raw wood as far as possible, using every bit of wood as carefully as we can. Our product development methods have been planned respecting the special qualities of raw wood. We manage the risks associated with competition for raw materials by continually developing our products and maintaining a strong brand and business concept.

Legislative changes

We sell the majority of Honkarakenne wooden houses in Finland, France, Japan, Russia and the CIS countries. Should any of these market areas pass new, unfavourable legislation, set unexpected taxes or other fees payable on income from those markets, limit imports, or set any other statutory regulations, this could seriously damage the business operations, financial position and result of the Company.

Future building regulations and in particular, new energy and fire safety standards may affect the profitability of our business.

We prepare ourselves for any risks associated with new legislation by long-term product development to ensure that Honkarakenne products always comply with all local requirements. In all countries in which we operate, we acquire all required approvals for Honkarakenne products. Our product development keeps a close eye on developments in

energy regulations, thus enabling us to respond effectively to changes.

Risks associated with our management structure and reporting principles

Strategic risks include the sustainability of our management structure and reporting principles. Honkarakenne abides by the Helsinki Stock Market Corporate Governance rules for organising its management and business control systems. Honkarakenne believes that the Helsinki Stock Market Corporate Governance rules provide a solid management system in which the governance structure, responsibilities and accountabilities have been clearly defined, and which is transparent about the essential principles of the system, and which is sufficient to create trust in the Honkarakenne Group and its management.

Operational risks

Financial risks are associated with goodwill, immaterial rights, calculated tax claims, the ability to pay dividends, and taxation. Operational risks are associated with products, distribution channels, personnel, and business operations and processes.

Risks associated with goodwill, calculated tax claims and immaterial rights

Changes in market conditions may cause risks associated with goodwill and immaterial rights. We do not perform any ordinary write-downs of goodwill and other such immaterial goods that do not have a defined economic life time, but they are assessed annually for any possible loss of value. For this purpose, our goodwill has been reserved for cash-flow producing units or, with partially-owned companies, the goodwill is included in their acquisition costs. According to the consolidated statement of financial position of 31 December 2011, the Company has a goodwill of some EUR 0.1 million remaining.

Cash flow predictions used for depreciation assessment and calculated tax claim value assessment are based on the Board's financial forecast. According to the consolidated

statement of financial position of 31 December 2011, the calculated tax claims amount to EUR 1.1 million. It is possible that the forecast associated with cash flow prediction will not be realised, which in turn may lead to depreciation of goodwill and calculated tax claims, and thus threaten our business profits and financial position.

Risks associated with the ability pay dividend

The Company's future ability to pay dividends to its shareholders depends on many factors, such as its result, financial position and capital requirement, as well as regulations of the Limited Liability Companies Act on distribution of profits.

Tax risks

Should any future tax inspection discover any discrepancies leading to an amendment of assessment, including possible tax increases or sanction of a fine, this could considerably affect the result and financial position of the Company.

Risks associated with product liability

We aim to minimise any product liabilities by developing products with the highest possible level of consumer safety. The Group has protected itself against product liability risk. Notwithstanding these protection measures there are no guarantees that a product liability case would not harm the Honkarakenne Group business operations, financial position and/or result.

Operational and process risks

Operational risks at Honkarakenne are associated with human factors, failed internal processes and causes due to external factors. We use systematic development to minimise any operative risks that are associated with running factory operations. The introduction of new manufacturing methods and production lines involves cost and capacity risks, and we try to protect ourselves against these with meticulous planning and personnel training. Dependence on large suppliers may increase our material, machinery and

component costs or have implications for our production. Operative problems may also be associated with changes in the distribution channel or logistics systems. Operational risks include risks associated with contracts.

The Group's business activities are based on functional and reliable information systems. We are managing the associated risks by duplicating any critical information systems, carefully considering the selection of our business partners, and standardising the workstation models, software and data security procedures we use. According to the nature of the Group's business activities, sales receivables and inventories are significant balance sheet items. We manage the credit loss risk associated with sales receivables through the Group's advance payment policy, credit granting policy and an efficient debt collection process.

The Group's core competencies are focused on the following business processes: marketing, sales, design, product development, production and logistics, as well as related support processes, such as information management, finance, human resources and communications. Unpredictable loss of core competencies and the inability of personnel to develop present a risk. The Company is continually aiming to improve both the core and other competencies of its employees by offering opportunities to learn at work and attend training, as well as recruiting new, skilled personnel as and when required. The turnover of key personnel has remained at a moderate level.

Risk of damage

The Company has two manufacturing plants in Finland, namely in Karstula and Alajärvi. These plants produce a significant amount of the Company turnover.

The Group manages fixed asset and business interruption insurances in a centralised manner, thus aiming for comprehensive cover in case of financial loss resulting from machinery breakdown, fire or other similar risks. In addition, automatic sprinkler systems have been installed on all critical production lines. The risk of damage also includes risks associated with occupational health and safety, the environment, and accidents. As part of the overall risk management procedure, the Group regularly assesses its level of insurance cover. We use insurance for all risk types where it

makes the best financial sense or is otherwise the best option.

Financial risks

The Group's business activities expose it to different types of financial risks. Our risk management procedures are aimed at minimising any negative impacts of financial market changes on the Group's result. The main financial risks include currency risk, interest risk, credit risk and liquidity risk. The Group's financing has been centralised at the parent company. The parent company's finance department is responsible for the management of financial risks in accordance with procedures approved by the Board.

Fluctuation of exchange rates may have a negative impact on the Honkarakenne result.

Honkarakenne operates in international markets, which exposes it to transaction and other risks due to foreign exchange positions. These risks are created when different currency payments are converted into the parent company's chosen currency.

The Group protects itself against currency risks by using the euro as the principal transaction currency for both sales and purchasing.

The Group's most significant foreign currency is the Japanese yen. In 2011, the proportion of the Group's turnover in yen was 13% (10% in 2010).

The consolidated statement of financial position of 31 December 2011 showed the nominal value of forward exchange agreements in yen as EUR 3.4 million (EUR 2.8 in 2010). Forward exchange agreements used by Honkarakenne do not meet the IAS 39 hedge accounting conditions.

Although the Company uses financial instruments to manage the currency risks it is exposed to, there can be no guarantees that future exchange rates could not significantly harm Honkarakenne's business activities, its financial position, results, future prospects and share price.

Fluctuation of interest rates may have a negative impact on the Honkarakenne result.

The Honkarakenne Group income and operational cash flow are mostly independent of market rate fluctuations. The Group is exposed to the interest risk of market value, which is mainly associated with our loan portfolio. The Group may borrow either on a fixed or variable interest rate, and it may protect itself against interest fluctuations by using an interest rate swap.

A significant interest rate rise may damage private consumer spending. In addition, an interest rate rise may negatively affect the price of borrowing and the Company's current financing costs. Honkarakenne closely follows interest rate developments in the markets and actively manages its interest risk. Although the Company takes active measures to manage the trends described above, failure to manage these risks could significantly threaten Honkarakenne's business, financial position, results, future prospects and share price.

The Group's consolidated statement of financial position of 31 December 2011 includes EUR 2.0 million (EUR 2.7 in 2010) in long-term outstanding payments, which are more than 180 days overdue.

The Group has one significant credit risk concentration regarding sales from one particular importer and its open balance of sales receivables, which does not include a bad debt allowance. New sales with the importer in question have been paid according to set payment terms. The importer in question has been receiving continuous deliveries, and the risk associated with its open balance of sales receivables has not increased. During the second quarter, we signed a payment plan contract with the importer regarding the sales receivables. The payment plan was updated during the last quarter. The balance in question has been decreasing during 2011.

We manage the credit loss risk with advance payments, bank guarantees and export documentary credits. Sales regions are responsible for the credit risk involved with sales receivables. The maximum amount of credit risk associated with the Group's sales receivables is equal to the book value

of sales receivables on 31 December 2011, including the above mentioned large importer's open sales receivables. Although the Company takes active measures to manage credit risk, failure to manage those risks could significantly threaten Honkarakenne's business, financial position, results, future prospects and share price.

We make derivative contracts only with banks that have a good credit rating. The maximum amount of credit risk associated with financial assets, other than sales receivables, is equal to the book value of those financial assets on 31 December 2011.

Liquidity risk

To maintain our ability to pay back debt, Honkarakenne depends on strong cash flow.

In order for Honkarakenne to be able to implement its strategy, it needs a strong cash flow to support the execution of Company-set objectives; to maintain its operations; to finance its debt payments and to secure sources of financing in the future. An increase in cash flow must be built on the growing sales of current products, and Honkarakenne's success in establishing new, profitable products and distribution channels. Should Honkarakenne not succeed in establishing sufficient cash flow to support these operations, or in arranging sufficient financing under acceptable terms, its business, financial position, results, future prospects and share price could be significantly threatened.

The Group's contingent liabilities were equal to EUR 32.9 million on 31 December 2011, consisting mainly of own debt-related encumbrances and forward change agreements.

Although the Company takes active measures to manage its liquidity risk, failure to manage those risks could significantly threaten Honkarakenne's business, financial position, results, future prospects and share price.

Appendix 19 includes a financing debt maturity table, and shows the maturity analysis. The figures do not show discounting, and they contain both interest payments and capital repayments.

Honkarakenne may not be able to secure financing at compatible rates.

The Group aims to continually assess and monitor the level of financing required for its business operations, in order for it to always possess enough liquidity to finance its business operations and repay maturing debts. We aim to guarantee the availability and flexibility of funds by maintaining liquid assets, utilising bank overdraft limits, and approaching several financing institutions to obtain funds.

The Group equity ratio includes a covenant risk. On 31 December 2011, EUR 0.8 million worth of our net loans with interest included a covenant condition with a 30% loan to equity ratio. On 31 December 2011, Honkarakenne's equity ratio was 52.6% (42.5% in 2010)

Share price risk

The Group does not have any significant investments in quoted shares, and thus the risk associated with fluctuation in these share market prices is minimal.

25. Management of capital

Honkarakenne's capital consists of its own equity and debt. Through the management of our capital, we aim at supporting our business operations, ensuring good operating conditions and increasing the value for owners. The Company's capital structure objective is to maintain an economic operating environment with an equity ratio of over 35%. The Company's return of capital to its owners consists of dividends and the acquisition of its own shares. The long-term objective for profit distribution is between 30 to 50% of the financial year result.

Capital structure and key business indicators

	31 December 2011	31 December 2010

Management's pension commitments and termination benefits

No special agreements apply to the retirement age of the CEO of Honkarakenne Oyj. The basic pension is contribution-based, in addition to which the CEO and the members of the Group's executive management are covered by a contribution-based plan, the cost of which totalled EUR 62.7 thousand EUR in 2011 (55.6 thousand EUR in 2010). The CEO of Honkarakenne Oyj has a six-months term of notice, in addition to which the CEO will receive a monetary compensation equal to 12 months' pay if the contract is terminated by the company. CEO Esa Rautalinko has resigned from the company after the date of financial statements in Jan 2012. The Board of Directors named Mikko Jaskari as acting CEO since 2 Feb 2012.

The formula used for calculating return on capital employed has changed, and the comparative data has been changed accordingly.

Calculation of key indicators

Return on equity, %	=	$\frac{\text{Profit for the period}}{\text{Total equity, average}} \times 100$
Return on capital employed, %	=	$\frac{\text{Profit/loss} + \text{financial expenses}}{\text{Equity} + \text{interest-bearing financial liabilities, average}} \times 100$
Equity ratio, %	=	$\frac{\text{Total equity}}{\text{Balance sheet total} - \text{advances received}} \times 100$
Interest-bearing net debt	=	Interest-bearing liabilities – cash and cash equivalents
Gearing, %	=	$\frac{\text{Interest-bearing liabilities} - \text{cash and cash equivalents}}{\text{Total equity}} \times 100$
Earnings/share (EPS)	=	$\frac{\text{Profit for the period attributable to equity holders of the parent}}{\text{Average number of outstanding shares}}$
Dividend payout ratio, %	=	$\frac{\text{Dividend per share}}{\text{Earnings per share}} \times 100$
Effective dividend yield, %	=	$\frac{\text{Dividend per share}}{\text{Closing share price at the balance sheet date}} \times 100$
Equity/share	=	$\frac{\text{Shareholders' equity}}{\text{Number of shares outstanding at the close of period}}$
Price-earnings (P/E) ratio	=	$\frac{\text{Share price at the balance sheet date}}{\text{Earnings per share}}$

NOTES TO THE FINANCIAL STATEMENTS OF THE PARENT COMPANY 31 DEC 2011

ACCOUNTING POLICIES

Fixed assets

Fixed assets are capitalised at direct acquisition cost.

Buildings and structures include revaluations prior to previous Accountancy Act and basis of them are evaluated annually.

Planned depreciation is calculated on a straight-line basis based on the economic life calculated from the fixed asset acquisition cost. The depreciation period for new production lines at plants included in Machinery and equipment is 12 years.

Depreciation and amortisation periods are based on the estimated useful lives and are:

Immaterial rights	5–10 years
Goodwill	5 years
Buildings and structures	20–30 years
Machinery and equipment	3–12 years
Other tangibles	3–10 years

Inventories

Items included in inventories are measured in accordance with the FIFO principle at direct acquisition cost or at the probable disposal price, whichever is lower.

Derivatives

The company's derivatives include forward exchange contracts and interest rate swaps. Forward exchange contracts are used for hedging against changes in anticipated cash flows from sales in foreign currencies. Forward exchange contracts are used to hedge nearly 50% of all anticipated 12-month cash flows in foreign currencies.

Interest rate swaps are used to change the variable interest rate in the company's loans from financial institutions into fixed interest rates. The original time to maturity in the interest rate swaps is 10 years at the most, and the interest is specified every three and six months.

Pension arrangements

The personnel's statutory pension security is arranged through pension insurance companies.

Recognition of deferred taxes

Deferred tax liabilities or assets are calculated on the temporary differences between taxation and the financial statements using the approved tax rate for the following years effective on the closing date. The statement of financial position includes deferred tax liabilities in their entirety and deferred tax assets in their estimated probable amount.

Items in foreign currencies

Receivables and payables in foreign currencies are translated into Finnish currency at the closing day rate.

1. Notes to the income statements (FAS)

THE MANAGEMENT INCENTIVE SCHEME AND OWN SHARES

On 31 May 2011, the Board of Directors of Honkarakenne made a decision on a Executive Group bonus scheme, with the aim of allowing significant long-term management shareholdings in the company. In relation to this, in 2010 Honkarakenne Oyj made a directed rights issue of 220,000 B shares and in addition to this the Executive Group purchased 49,000 B shares. In second quarter of 2011 the Board decided to make a directed rights issue and relinquished 17,250 its own B shares to Honka Management Oy, in order to enlarge the system so that a new member of Honkarakenne's Executive Group, Sanna Wester, could join it.

In 2011 in directed rights issue Honkarakenne relinquished 17,250 of its own shares (HONBS) as part of the Executive Group share ownership scheme. The purchase price of the shares was EUR 5.26 per share for a total of EUR 90,735. After the transaction, at the year-end, Honka Management owned 286,250 B shares in Honkarakenne Oyj.

At the end of financial year, the Group owned 364,385 of its own B shares, at a total purchase cost of EUR 1,381,750.23. These shares made up 7.05 % of the company's share capital and 3.35 % of all votes. The acquisition cost of the shares was entered in the consolidated financial statements, as a deduction from shareholders' equity.

AUTHORISATIONS

The Board of Directors is authorised until 25 March 2012 to acquire a maximum of 400,000 own shares using the company's funds from the unrestricted equity. Shares may be acquired for the purpose of developing the capital structure of the company, for the financing of implementation of acquisitions or other similar arrangements, or to be transferred or cancelled. The authorisation also covers the option to acquire own shares to execute share-based incentive schemes and to accept the company's own B shares as a pledge.

The Board of Directors is authorised until 25 March to make a decision on either a bonus or capitalisation issue of shares, as prescribed in Section 1, Chapter 10 of the Limited Liability Companies Act, regarding the issue of options rights in one or more batches under following conditions:

- Under the authorisation, the Board of Directors may issue or relinquish of its own B shares held by the company a maximum of 400,000 inclusive of any shares that may be issued under special rights.
- The issue may also be directed to the company itself, within the confines of the law.
- The authorisation entitles the company to deviate, within legal provisions, from the shareholders' pre-emptive right to subscribe for new shares (directed issue).
- The authorisation may be used to carry out acquisitions or other arrangements within the scope of the company's business or to finance investments, to improve the company's capital structure, as part of the company's incentive scheme or for other purposes designated by the Board of Directors.
- The authorisation includes the right to decide on the manner in which the subscription price is recognised in the company's balance sheet. Apart from cash, other property (property given as subscription in kind) may be used to pay the subscription price, either in full or in part. Furthermore, claims held by the subscriber may be used to set off the subscription price. The Board of Directors is entitled to decide on any other matters arising from the share issue or relating to the special rights giving entitlement to shares.

SHAREHOLDER AGREEMENT

Saarelainen Oy and certain shareholders of Honkarakenne Oyj representing the Saarelainen family signed an amended shareholder agreement on 17 February 2009. The previous shareholder agreement was signed on 21 April 1990. The parties to the agreement agreed that the shareholders will strive to exercise their voting rights unanimously in the company meetings. If they are unable to reach a consensus, the shareholders will vote in favour of Saarelainen Oy's position. When members of the Saarelainen family are elected to the Board of Directors of Honkarakenne Oyj, the election will be subject to an agreement based on the shareholders' unanimous decision. If the parties are unable to

reach a consensus, the shareholders' meeting of Saarelainen Oy will decide on which family member is to be elected based on the majority of votes given at the meeting.

According to the shareholder agreement, the shareholders agree not to sell or assign the Honkarakenne Oyj A shares they own to anyone else except a shareholder who has signed the agreement, or to Saarelainen Oy, with certain exceptions, before making such shares available under the right of first refusal to Saarelainen Oy or a party designated by Saarelainen Oy.

In addition to Saarelainen Oy, the agreement covers the following shareholders: Saarelainen Sinikka, Saarelainen Reino, Saarelainen Raija deceased person's estate, Saarelainen Erja, Saarelainen Eero, Saarelainen Mauri, Ruuska Pirjo, Saarelainen Anita, Saarelainen Kari, Saarelainen Paula, Ruponen Helena, Saarelainen Jukka, Saarelainen Sari and Saarelainen Jari. The total shareholding of those covered by the agreement and their controlled entity Lieksaare Oy and their minor children is 284,029 A shares and 1,365,554 B shares. After the share issues in 2011, their proportion of all shares was 31.94% and proportion of voting rights was 64.96%.

Disclosures concerning shares and shareholders in accordance with the Decree of the Ministry of Finance on the Regular Duty of Disclosure of an Issuer of a Security (153/2007) are also presented in Directors' Report.

This document is an English translation of the Finnish auditor's report. Only the Finnish version of the report is legally binding.

AUDITOR'S REPORT

To the Annual General Meeting of Honkarakenne Oyj

We have audited the accounting records, the financial statements, the report of the Board of Directors, and the administration of Honkarakenne Oyj for the financial period 1 January – 31 December 2011. The financial statements comprise the consolidated statement of financial position, statement of comprehensive income, statement of changes in equity and statement of cash flows, and notes to the consolidated financial statements, as well as the parent company's balance sheet, income statement, cash flow statement and notes to the financial statements.

Responsibility of the Board of Directors and the Managing Director

The Board of Directors and the Managing Director are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU, as well as for the preparation of financial statements and the report of the Board of Directors that give a true and fair view in accordance with the laws and regulations governing the preparation of the financial statements and the report of the Board of Directors in Finland. The Board of Directors is responsible for the appropriate arrangement of the control of the company's accounts and finances, and the Managing Director shall see to it that the accounts of the company are in compliance with the law and that its financial affairs have been arranged in a reliable manner.

Auditor's Responsibility

Our responsibility is to express an opinion on the financial statements, on the consolidated financial statements and on the report of the Board of Directors based on our audit. The Auditing Act requires that we comply with the requirements of professional ethics. We conducted our audit in accordance with good auditing practice in Finland. Good auditing practice requires that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and the report of the Board of Directors are free from material misstatement, and whether the members of the Board of Directors of the parent company or the Managing Director are guilty of an act or negligence which may result in liability in damages towards the company or have violated the Limited Liability Companies Act or the articles of association of the company.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements and the report of the Board of Directors. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation of financial statements and report of the Board of Directors that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements and the report of the Board of Directors.

KPMG Oy Ab, a Finnish limited liability company and a member firm of the KPMG network of independent member firms affiliated with KPMG International Cooperative ("KPMG International"), a Swiss entity.

Honkarakenne Oyj
Auditor's report
7 March 2012

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion on the consolidated financial statements

In our opinion, the consolidated financial statements give a true and fair view of the financial position, financial performance, and cash flows of the group in accordance with International Financial Reporting Standards (IFRS) as adopted by the EU.

Opinion on the company's financial statements and the report of the Board of Directors

In our opinion, the financial statements and the report of the Board of Directors give a true and fair view of both the consolidated and the parent company's financial performance and financial position in accordance with the laws and regulations governing the preparation of the financial statements and the report of the Board of Directors in Finland. The information in the report of the Board of Directors is consistent with the information in the financial statements.

- Holds 5,950 Honkarakenne Oyj A shares, and 88,482 Honkarakenne Oyj B shares

The Board convenes as scheduled at the initial organisation meeting of the year (10–11 meetings per year). The Board may also hold additional meetings as required, making the total number of meetings between 12 and 15 annually. Scheduled meetings discuss the company's current situation and its future prospects based on information presented by the CEO. The initial organisation meeting shall agree on a general outline of themes and topics for the rest of the year, allowing the Executive Group to prepare for these meetings.

The Annual General Meeting of 1 April 2011 decided that Board members shall be paid a monthly fee of EUR 1,200 and the Chairman a monthly fee of EUR 5,000. Fifty per cent of each fee may be paid with treasury shares held by the company. In addition, the Board members receive expense and travel allowances as per the general Finnish travel compensation regulations. Board committee members receive a fee of EUR 500 per meeting.

During the accounting period of 2011, two Board members were either employed by group companies or held positions as consultants for the company.

The Board has a responsibility to

- make decisions on company strategy, goals and objectives
- approve the Group's action plan and budget
- decide on company policies
- scrutinise and approve the financial statements and interim reports
- make decisions on business acquisitions and arrangements
- make decisions on and approve the Group's financial policies
- make decisions on significant investments, property transactions and contingent liabilities
- approve the Group's reporting procedures and internal audit
- make decisions on the Group's structure and organisation
- draft the Group's policy on payment of dividends
- appoint the CEO, the Deputy CEO and a substitute for the CEO, and make decisions on their compensation and other benefits
- make decisions on compensation and other benefits for the Executive Group
- make decisions on the Executive Group's reward and incentive systems
- assume responsibility for the growth of the company's value
- assume responsibility for all other duties prescribed for a company Board in the Limited Liability Companies Act, Articles of Association or other applicable sources

The members of the Board's Audit Committee comprise Mr Lasse Kurkilahti (Chairman), Mr Teijo Pankko and Ms Pirjo Ruuska. The Audit Committee monitors the financial statements reporting and general financial reporting processes, as well as the efficiency of internal

supervision, auditing and risk management systems, supervises the statutory auditing process and evaluates the independence of the auditor.

The Board held 15 Board meetings in 2011. The Board members' meeting attendance rate was 91%.

2. Chief Executive Officer

The Board of Directors appoints a CEO, who leads the Company's operations according to the instructions and specifications supplied by the Board. The CEO is responsible for the legality of company accounts and the reliable management of company finances. The Board of Directors approves the terms of the CEO's employment in a written contract of employment.

The company's President and CEO is Esa Rautalinko.

Esa Rautalinko

- Born in 1962
- M.Sc. (Econ.) 1988
- Honkarakenne Oyj, CEO since 2009. TeliaSonera Finland Oyj, President and Country Manager & Head of Mobility Services Finland 2008–2009, Senior Vice President, Mobility Services Finland 2005–2008. Scottish & Newcastle Plc., Development Director Nordic 2004–2005. Oyj Hartwall Abp, Marketing and Exports Director 1996–2004. Nokia Home Electronics, Managing Director 1995–1996, Sales Director 1993–1995. Van den Bergh Foods, Finnish Unilever, Marketing Manager 1992–1993. Huhtamäki Oy Jalostaja, Marketing Manager 1991–1992, Product Group Manager 1990–1991, Product Manager 1988–1990.
- Board membership: Suomen Erillisverkot Oy since 2011; Metsäteollisuus ry since 2011; Helsinki Chamber of Commerce since 2009; FIM Group since 2008; FIM Varainhoito Oy since 2001; Mainostajien liitto (Association of Finnish Advertisers) since 2008; Maanpuolustuksen tuki ry since 2009; Sinisen Reservin Säätiö since 2004; Finnish Flash r.y., Board Vice Chairman since 2004; Markkinointijohdon ryhmä ry, Board Chairman since 2011
- Rautalinko owns 47% of Honka Management Oy, which holds 286,250 B shares.

Esa Rautalinko has a CEO's contract of employment with a monthly salary and benefits of EUR 22,770 as from 1 May 2011 (EUR 22,500 per month until 30 April 2011). In addition, Mr Rautalinko enjoys a personal incentive bonus arrangement. If the annual performance targets approved by the Board of Directors are achieved, Mr Rautalinko shall receive a maximum bonus of 60% of his annual salary that year. The CEO has the right to retire at the age of 63. A sum equivalent to one month's salary is paid into the CEO's pension fund annually. Moreover, if separate performance targets are met, the Board of Directors may de-

cide to pay an additional sum, equivalent to one month's salary, into the pension fund. Mr Rautalinko has a notice period of six months. If the company decides to terminate Mr Rautalinko's employment, he shall have the right to receive an additional severance payment equivalent to his salary for 12 months.

The company's CEO and the Executive Group together own Honka Management Oy, which serves as a long-term incentive scheme. Honka Management owns a total of 286,250 Honkarakenne B shares. To obtain the shares, Honkarakenne issued 237,250 shares directly to Honka Management and acquired 49,000 shares from the market. The subscription and acquisition price was EUR 3.71 per share for the 220,000 shares issued in 2010. At the time, Honkarakenne issued a loan of EUR 800,000 to Honka Management Oy to cover part of the acquisition cost of the shares. The remainder of the acquisition price was collected from the CEO and the Executive Group. In addition, Honka Management subscribed for 17,250 shares at the acquisition price of EUR 5.26 per share in 2011, when Sanna Wester, Vice President, Marketing, became employed with Honkarakenne. Honkarakenne issued a loan of EUR 51,023 to cover part of the cost of this transaction, with Sanna Wester financing the remainder of the acquisition price.

Any transfer of Honkarakenne shares held by Honka Management has been limited during the scheme period. In principal, the Executive Group's ownership of Honka Management shall remain in force until the scheme is dismantled. If the employment of a member of Honkarakenne Group's Executive Group is terminated for reasons due to the member himself/herself prior to the dismantling of the bonus scheme, his/her holding in Honka Management may be bought out before the scheme is to be dismantled, and without the member gaining any financial benefit from the scheme. If Honkarakenne dismisses a member of the Executive Group, the member shall remain a normal shareholder in Honka Management. The bonus scheme with Honka Management Oy is valid until 2014, after which it is intended that the programme will be dismantled. Depending on the performance of the company's share, the scheme may be extended twice, for one year at a time.

Honka Management is owned by the following persons: Esa Rautalinko 47.0%, Mikko Jaskari 18.8%, Risto Kilkki 9.4%, Eino Hekali 9.4%, Reijo Virtanen 9.4% and Sanna Wester 6.0%.

The members of the Executive Group receive compensation which consists of a fixed monthly salary and an incentive bonus scheme. In addition, a sum equivalent to one month's salary is paid annually into each member's pension fund. Moreover, if separate performance targets are met, the Board of Directors may decide to pay an additional sum, equivalent to one month's salary, into the members' pension funds.

4. Auditors

Under the provisions of the Articles of Association, Honkarakenne Oyj must appoint one regular auditor and one deputy auditor. If the regular auditor is an auditing firm, no deputy auditor need be appointed. Following their election, the term of the auditors covers the remainder of the accounting period during which they were elected and expires at the end of the following Annual General Meeting.

The Annual General Meeting of 1 April 2011 elected the firm of authorised public account-ants KPMG Oy Ab as the company's auditors, with APA Reino Tikkanen as the principal auditor.

The Group paid an auditing fee of EUR 55 thousand for the accounting period of 2011. During 2011, KPMG Oy Ab received a total of EUR 59 thousand for its auditing, consulting and tax services.

5. Internal supervision, risk management and internal audit

Internal supervision and risk management

One of the primary objectives of internal supervision at Honkarakenne Oyj is to ensure that financial reporting remains reliable at all times.

The CEO of Honkarakenne Oyj chairs the Executive Group, the members of which include directors from different operational departments of the company. The Executive group convenes for general meetings between 15 and 25 times annually, and holds weekly follow-up meetings with a limited agenda. Sales and Production departments have their own executive groups. The Sales groups hold weekly meetings and the Production group meets on a monthly basis. In addition, other Honkarakenne operations have their own steering groups, which consist of key people and meet as required.

Honkarakenne's business strategy is updated and its targets are defined every year. The setting of Group-level targets must precede internal supervision, because those targets are used to derive individual targets for different companies, units, functions and managers. The company's business plan sets quantitative and qualitative targets for different business operations, and the progress of these targets is regularly monitored.

The Chief Financial Officer is responsible for setting, maintaining and developing financial steering and reporting requirements and processes. He is also responsible for setting up a system of supervision and seeing it through. The system of supervision includes guidance, defining limits of authority, balancing, Executive Group reports and non-conformance reports. The most important guidance is provided in the Honkarakenne Group's accounting manual, which consolidates all essential accounting and financial reporting instructions. The manual ensures that all financial reporting at Honkarakenne remains reliable at all times. The Chief Financial Officer monitors that all set processes and controls are being followed. He is also tasked with controlling the reliability of financial reporting.

Auditors and other external assessors evaluate control measures for the reliability of financial reporting.

The Board of Directors approves Honkarakenne's strategy, annual action plans and budgets. The Audit Committee, which assists the Board, approves risk management principles and policies and risk limits, and regularly monitors the effectiveness and adequacy of internal supervision and risk management processes. The Audit Committee is also responsible for ensuring that internal control of financial reporting processes is carried out.

The Executive Group produces reports separately and independently from the rest of the business operations. For monitoring and controlling its business activities, Honkarakenne uses an appropriate and reliable Enterprise Resource Planning (ERP) system, on which its other information systems and affiliates' own systems are based. Honkarakenne has a valid, up-to-date data security policy and supporting data security guidelines.

Internal audit

The process of internal auditing evaluates the appropriateness of internal supervision, risk management and operations. Internal auditing aims to ensure that the above areas remain functional, even in the most critical situations.

It has not been considered necessary to implement a separate organisation for internal auditing, as financial administration staff commonly carry out the auditing tasks. If the independence of internal auditing is jeopardised, the services of an auditing firm appointed by a General Meeting, or another auditing firm, shall be used. The Chief Financial Officer shall report any auditing observations to the Audit Committee and the CEO according to a pre-agreed schedule.

The parent company's financial administration staff carry out internal audits in the subsidiaries, according to the action plan confirmed by the Board of Directors. This does not affect any party's independence.

6. Insiders

Honkarakenne Oyj adheres to the Insider Guidelines prepared by NASDAQ OMX Helsinki Ltd (previously, OMX Nordic Exchange Helsinki Oy). Permanent Insiders include the company's Board of Directors, the CEO, the Executive Group, auditors, and other company managerial and financial administration employees. The Chief Financial Officer acts as the Insiders' representative. Insiders are prohibited from trading in company shares for 14 days before any interim financial reports or financial statements are published.
